

State: Uttar Pradesh

Agriculture Contingency Plan for District: Bagpat District

1.0 District Agriculture profile				
1.1	Agro-Climatic/Ecological Zone			
	Agro Ecological Sub Region (ICAR)	Northern Plain (And Central Highlands) Including Aravallis, Hot Semi-Arid Eco-Region (4.1)		
	Agro-Climatic Zone (Planning Commission)	Upper Gangatic Plain Zone(V)		
	Agro Climatic Zone (NARP)	Western Plain Zone (UP-3)		
	List all the districts falling under the NARP Zone* (*>50% area falling in the zone)	Muzaffarnagar, Meerut, Gaziabad, G.B.Nagar and Bulandshahr.		
	Geographic coordinates of district headquarters			
	Geographic coordinates of district headquarters	Latitude	Longitude	Altitude
		29 ⁰ 0' 48.205" N	77 ⁰ 18'42.532"E	222 Mt
	Name and address of the concerned ZRS/ ZARS/ RARS/ RRS/ RRTTS	No		
	Mention the KVK located in the district with address	K.V.K., New Khakra Tahsil Ke Pechhe Bagpat of S.V.P.U.A&T, Meerut.		
	Name and address of the nearest Agromet Field Unit (AMFU, IMD) for agro-advisories in the Zone	S.V.P. University Meerut / IARI New Delhi		

1.2	Rainfall	Normal RF(mm)	Normal Rainy days (number)	Normal Onset (specify week and month)	Normal Cessation (specify week and month)
	SW monsoon (June-Sep):	598.7	42	3 rd week of June	2 nd week of September
	NE Monsoon(Oct-Dec):	31.5	12	3 rd week of December	2 nd week of January
	Winter (Jan- March)	66.2	15	-	-
	Summer (Apr-May)	23.8	7	-	-
	Annual	720.2	76	-	-

1.3	Land use pattern of the district (latest statistics)	Geographical area	Cultivable area	Forest area	Land under non-agricultural use	Permanent pastures	Cultivable wasteland	Land under Misc. tree crops and groves	Barren and uncultivable land	Current fallows	Other fallows
	Area ('000 ha)	134.994	109.816	1.525	15.916	0.092	2.008	0.074	2.355	2.284	0.924

1.4	Major Soils (common names like red sandy loam deep soils (etc.,))*	Area ('000 ha)	Percent (%) of total
	Sandy loam	74.22	67.58
	Loam	24.43	22.25
	Clay loam	6.95	6.33
	Silt loam	4.513	4.11
	Others (specify):		

1.5	Agricultural land use	Area ('000 ha)	Cropping intensity %
	Net sown area	108.941	157.38%
	Area sown more than once	63.010	

Gross cropped area	172.826	
--------------------	---------	--

1.6	Irrigation	Area ('000 ha)		
	Net irrigated area	105.493		
	Gross irrigated area	172.526		
	Rainfed area	3.448		
	Sources of Irrigation	Number	Area ('000 ha)	Percentage of total irrigated area
	Canals		2.792	2.6%
	Tanks		0	—
	Open wells		0.198	0.19%
	Bore wells		102.503	96.58%
	Lift irrigation schemes	NIL	—	—
	Micro-irrigation		0.122	0.11
	Other sources (please specify)		0	
	Total Irrigated Area		105.615	
	Pump sets			
	No. of Tractors			
	Groundwater availability and use* (Data source: State/Central Ground water Department /Board)	No. of blocks/ Tehsils Block-6	(%) area	Quality of water (specify the problem such as high levels of arsenic, fluoride, saline etc)
	Over exploited	1	-	Not reported
	Critical	2	-	do
	Semi- critical	2	-	do
Safe	1	-	do	
Wastewater availability and use	-	-	do	
Ground water quality				

*over-exploited: groundwater utilization > 100%; critical: 90-100%; semi-critical: 70-90%; safe: <70%

1.7 Area under major field crops & horticulture (as per latest figures) (2008-09)

1.7	Major field crops cultivated	Area ('000 ha)							
		Kharif			Rabi			Summer	Grand total
		Irrigated	Rainfed	Total	Irrigated	Rainfed	Total		
Rice	—	—	3.646	—	—	3.646	—	3.646	
Wheat	—	—	—	—	—	56.176	—	56.176	
Sugarcane	—	—	—	—	—	56.758	—	56.758	
Mustard	—	—	—	—	1.306	1.306	—	1.306	
Toria	—	—	—	2.000	—	2.000	—	2.000	
Pigeonpea	—	0.123	0.123	—	—	—	—	0.123	

Horticulture crops - Fruits	Area ('000 ha)		
	Total	Irrigated	Rainfed
All Fruits Crops(Mango+Guava)	8.432 ha	—	8.732
Horticulture crops - Vegetables	Total	Irrigated	Rainfed
Potato	0.503 ha	0.503	—
Other Vegetable Crops	32.753 ha	27.253	5.5
Medicinal and Aromatic crops	Total	Irrigated	Rainfed
Flowers(Marigold+Gladiolus)	0.160	0.160	—
Plantation crops	Total	Irrigated	Rainfed
Eucalyptus	0.015	—	0.015
Poplar	0.098	0.098	—
Eg., industrial pulpwood crops etc.	—	—	—
Fodder crops	Total	Irrigated	Rainfed
Sorghum	47.135	21.246	25.888
Berseem	3.465	3.465	—
Pearl millet/Maize	1.216	0.562	0.654
Total fodder crop area	51.815	25.273	26.542
Grazing land	0.046	—	—
Sericulture etc	—	—	—
Others (specify)	—	—	—

1.8	Livestock		Male ('000)	Female ('000)	Total ('000)		
	Non descriptive Cattle (local low yielding)		9.325	70.370	79.695		
	Improved cattle		NA	NA	NA		
	1.9	Crossbred cattle		8.641	33.844	42.485	
		Non descriptive Buffaloes (local low yielding)		67.264	255.078	322.343	
		Descript Buffaloes		28.827	109.319	138.147	
		Goat		4.326	10.883	15.209	
		Sheep(India+Exotic)		1.099	3.016	4.115	
		Others (Camel, Pig, Yak etc.)				467.616	
		Commercial dairy farms (Number)					
		Poultry		No. of farms	Total No. of birds ('000)		
		Commercial		01	4.000		
		Backyard			4.317+6.159=10.476		
1.10	Fisheries (Data source: Chief Planning Officer)						
	A. Capture						
	i) Marine (Data Source: Fisheries Department)	No. of fishermen	Boats		Nets		Storage facilities (Ice plants etc.)
			Mechanized	Non-mechanized	Mechanized (Trawl nets, Gill nets)	Non-mechanized (Shore Seines, Stake & trap nets)	
			-	-	-	-	-
	ii) Inland (Data Source: Fisheries Department)	No. Farmer owned ponds		No. of Reservoirs		No. of village tanks	
		-		-		673	
	B. Culture						
				Water Spread Area (ha)	Yield (t/ha)	Production ('000 tons)	
	i) Brackish water (Data Source: MPEDA/ Fisheries Department)			-	-	-	
ii) Fresh water (Village tanks) (Data Source: Fisheries Department)			667.78 ha	-	-		
Others							

1.11 Production and Productivity of major crops (2008-09)

1.11	Name of crop	Kharif		Rabi		Summer		Total		Crop residue as fodder ('000 tons)
		Production ('000 t)	Productivity (kg/ha)							
Major Field crops (Crops to be identified based on total acreage)										
	Rice	9.906	2717	-	-	-	-	9.906	0.27	6.182
	Wheat	-	-	213.244	3796	-	-	213.244	3796	262.290
	Sugarcane	-	-	-	-	-	-	3233.684	56793	517.280
	Mustard	-	-	1.443	1105	-	-	1.443	1105	-
	Toria	-	-	1.937	969	-	-	1.937	969	-
	Others									
Major Horticultural crops (Crops to be identified based on total acreage)										
	All Fruits	-	-	-	-	-	-	150.800	1727	
	All Vegetables	-	-	-	-	-	-	371.800	1135	
	Potato	-	-	-	-	-	-	130.000	25845	
	Flowers	-	-	-	-	-	-	0.715	446.8	
	Others									

1.12	Sowing window for 5 major field crops (start and end of normal sowing period)	Rice	Wheat	Sugarcane	Mustard	Toria
	Kharif- Rainfed	-	-	-	-	-
	Kharif-Irrigated	June-July	-	-	-	-
	Rabi- Rainfed	-	Nov-Dec	March	Oct	Sept
	Rabi-Irrigated	-	Nov-Dec	April-May	Oct-Nov	Sept

1.13	What is the major contingency the district is prone to? (Tick mark)	Regular	Occasional	None
	Drought	x	√	x
	Flood	x	X	√
	Cyclone	x	X	√
	Hail storm	x	X	√
	Heat wave	x	√	X
	Cold wave	x	√	X
	Frost	x	√	X
	Sea water intrusion	x	x	√
	Pests and disease outbreak (specify)Pyrilla,Grass hopper, Heleothis, shoot borer, white grub etc.	√	x	x
	Others (specify) Fog	√	x	x

1.14	Include Digital maps of the district for	Location map of district within State as Annexure I	Enclosed: Yes
		Mean annual rainfall as Annexure 2	Enclosed: No
		Soil map as Annexure 3	Enclosed: Yes

Annexure I

Soil map

Legend	Description
1	Deep, loamy soils
2	Deep, loamy soils and silty soils
3	Deep, fine (moderately saline and sodic) soils and loamy soils
4	Deep, loamy soils and loamy soils

2.0 Strategies for weather related contingencies

2.1 Drought

2.1.1 Rainfed situation

2.1.2 Drought Irrigated situation

Condition	Major Farming situation ^f	Normal Crop/ cropping system ^g	Change in crop/cropping system ^h	Suggested Contingency measures			
				Agronomic measures ⁱ	Remarks on Implementation ^j		
Delayed release of water in canals due to low rainfall	Upland sandy loam soils	Rice (Basmati)- Wheat	Replace rice with maize or aerobic rice Rice: PS 4, 5, PB 1, PRH 10 Maize: Kanchan, Sweta, Navin, Surya	<ul style="list-style-type: none"> • Use short duration varieties • Light irrigation with tube well water • Follow alternate wetting and drying schedule of irrigation in rice • Alternate Furrow irrigation • Mulching in sugarcane/maize 	<ul style="list-style-type: none"> • Seed through KSSC and NFSM • Adequate supply of electricity/diesel should be ensured by the Govt. agencies. 		
		Sorghum (Fodder)/Maize-Potato/ Wheat	Pearl millet/Greengram/Blackgram - Potato/ Wheat Pearl millet: WCC-75, Raj-171, Pusa-23, Pusa-322				
		Sugarcane + cucurbits –Ratoon-Wheat	No change required				
	Lowland clay loam soils	Rice-wheat	Basmati rice –Wheat Rice: PS 4, 5, PB 1, PRH 10, Kanchan, Sweta, Navin, Surya			<ul style="list-style-type: none"> • Use short duration varieties • Light irrigation with tube well water • Follow alternate wetting and drying schedule of irrigation in rice 	<ul style="list-style-type: none"> • Seed through KSSC and NFSM • Adequate supply of electricity/diesel should be
		Sorghum(Fodder)-	Pearl millet –Wheat				

Condition	Suggested Contingency measures

	Before the event ^s	During the event	After the event
Drought			
Feed and fodder availability	<ul style="list-style-type: none"> • Fodder crop Insurance • Making of feed blocks • Encourage farmers to allocate some lands for cultivating perennial fodder (Napier grass, Subabul), specially on bunds and wasteland • Establishing fodder banks, encouraging fodder crops in irrigated area • Making silage or hay of excess fodder. • Statistics regarding feed/fodder availability and requirement should be updated by the concerned deptt. • Seed production and development of drought resistant crops and their varieties of fodder crops. • Encourage farmers to adopt sprinkler irrigation system. • Training to the farmers and extension functionaries for production and long term storage of feed and fodder. 	<ul style="list-style-type: none"> • Utilizing fodder from perennial trees/shrubs/fodder bank reserves for small ruminant. • Utilizing stored fodder as silage, hay, feed blocks & mixture etc. • Migration of herd /flock to other places. • Establishment of communication and linkage with other state agencies. 	<ul style="list-style-type: none"> • Availing crop insurance • Cultivation of fast growing green fodder crops. • Development of drought resistance fodder. • Increase the no. of Fodder Banks for future use.
Drinking water	<ul style="list-style-type: none"> • Preserving water in the pond/tank for drinking purpose. • Excavation of bore well/creation of tanks or ponds. • De-silting of village ponds on regular basis and adopt water harvesting 	<ul style="list-style-type: none"> • Using preserved water in the tanks for drinking • Available ground water should be used for drinking on priority basis. 	<ul style="list-style-type: none"> • Recharge of well/Tanks etc.

	<p>techniques through water shed approach.</p> <ul style="list-style-type: none"> • Filling of the ponds with canal/tube well water during lean period. 		
Health and disease management	<ul style="list-style-type: none"> • Farmers should be encouraged to avail Livestock insurance • Training to livestock owners regarding natural calamities. • Veterinary preparedness with medicines and vaccines. • Vaccination 	<ul style="list-style-type: none"> • Conduction mass animal health camps and treating the effected animals. • Mass campaigning though different media regarding possible outbreak of diseases and their management. 	<ul style="list-style-type: none"> • Availing insurance benefits. • Followed standard Livestock management practices. • Proper health care & treatment.
Floods			
Feed and fodder availability	<ul style="list-style-type: none"> • Fodder crop Insurance • Making of feed blocks • Encourage farmers to allocate some lands for cultivating perennial fodder (Napier grass, Subabul), specially on bunds and wasteland • Establishing fodder banks, encouraging fodder crops. • Making silage or hay of excess fodder and that should be stored on up land. • Statistics regarding feed/fodder availability and requirement should be updated by the concerned deptt. • Seed production and development of crops and their varieties of fodder crops for water logged conditions. • Training to the farmers and extension functionaries for production and long term storage of feed and fodder. 	<ul style="list-style-type: none"> • Utilizing fodder from perennial tress/shrubs/fodder bank reserves. • Use of feed mixture/block hay etc • Migration of flock /herds • Establishment of communication and linkage with other state agencies 	<ul style="list-style-type: none"> • Availing crop insurance • Cultivation of fast growing green fodder crops

Drinking water	<ul style="list-style-type: none"> • Making suitable provision for safe drinking surface water including excavation of bore well/hand pump (India mark—II) at community level. • Make farmers aware not to use contaminated/ flood water for drinking purpose. 	<ul style="list-style-type: none"> • Contaminated flood water should not be used for drinking. 	<ul style="list-style-type: none"> • Open sources of drinking water (tank/well) should be further treated with potassium per magnate.
Health and disease management	<ul style="list-style-type: none"> • Live stock Insurance • Training to livestock owners regarding natural calamities. • Veterinary preparedness with medicines and vaccines. • Vaccination • 	<ul style="list-style-type: none"> • Conduction mass animal health camp and treating the effected animals. • Training to livestock owners regarding natural calamities. • Establishment of Co-ordination with other Agencies. • Use of mass media to spread expat advice • 	<ul style="list-style-type: none"> • Culling sick animals • Availing insurance benefits. • Culling unproductive livestock • Proper disposal of corpse of dead bodies to prevent the spread of contagious diseases.
Cyclone N.A	N.A	N.A	N.A
Heat wave and cold wave			
Shelter/environment management	<ul style="list-style-type: none"> • Avoid use of GI sheet for roofing in the animal shed • Create adequate sources for additional supply of water to protect the animals from heat waves. • Establishment of modern shelter sheds. • As far as possible grow shade trees such as Neem, Pilkhan, Karanj etc near the animal sheds. • Make provision for adequate no. of fans/coolers /heaters according to the 	<ul style="list-style-type: none"> • Provide the thatches/ tarpaulins/ rags in the animal sheds to protect against direct entry of hot/ cold waves • Provide proper bedding to prevent from cold and proper ventilation to prevent from heat. • Provide drinking water to animal frequently during heat wave • Watch the forecast of weather department. • As for as possible the animal should be allowed to wallow in pounds/ canals/ 	Repair and maintenance of additional facilities

	situation, if possible	river or give bath once or twice in a day during heat waves	
Health and disease management	<ul style="list-style-type: none"> • Insure the animals • Training to livestock owners/ para-vets regarding preventive measure against extreme weather conditions • Veterinary preparedness with medicines and vaccines etc. • Vaccination against FMD & Cold 	<ul style="list-style-type: none"> • Organize village level animal health camps • Consult veterinary officer immediately if any adverse symptoms are noticed • Use of ITKs for food supplements 	<ul style="list-style-type: none"> • Proper after care of animals. • Availing insurance benefits. • Proper disposal of corpse of dead bodies to prevent the spread of contagious diseases.

based on forewarning wherever available

2.5.2 Poultry

	Suggested contingency measures			Convergence/ linkages with ongoing programs, if any
	Before the event ^a	During the event	After the event	
Drought				
Shortage of feed ingredients	<ul style="list-style-type: none"> • Making and storage of feed concentrates • Awareness regarding traditional feed banks. • Feed requirement data should be generated • Prepare the feed requirement data base of poultry farm. • Store the feed ingredients 	<ul style="list-style-type: none"> • Use of feed concentrates/ mixture/blocks etc • Establishment of communication with other state agencies. • Use of locally available feed recourses. • Import the feed recourse form other states. 	<ul style="list-style-type: none"> • Availing insurance • Increase the no. of feed banks for future use 	
Drinking water	<ul style="list-style-type: none"> • Making extra facility for drinking water. • Repair & maintenance of water resources 	<ul style="list-style-type: none"> • Frequent supply of drinking water 		
Health and disease management	<ul style="list-style-type: none"> • Veterinary preparedness with medicines and vaccines. • Vaccination • Training to poultry Growers regarding natural calamities. 	<ul style="list-style-type: none"> • Treatment of affected poultry birds 	<ul style="list-style-type: none"> • Culling of flock • Availing insurance benefits • Proper disposal of corpse of dead bodies to prevent the spread of contagious diseases 	
Floods				

Shortage of feed ingredients	<ul style="list-style-type: none"> • Sufficient quantity of feed ingredients should be stored 	<ul style="list-style-type: none"> • Use of stored feed in balanced form • Prevent the feed from moisture. 	<ul style="list-style-type: none"> • Cleaning of feed store & repair if any. • Moist feed should be dried & treated as per requirement 	
------------------------------	--	--	--	--

Drinking water	<ul style="list-style-type: none"> • Make provision of ground water for drinking 	<ul style="list-style-type: none"> • Use only Ground water obtained from India Mrka II or Tube well 	<ul style="list-style-type: none"> • Repair, maintenance and cleaning of water recourse • Sanitation of open Wells 	
Health and disease management	<ul style="list-style-type: none"> • Veterinary preparedness with medicines and vaccines • Vaccination 	<ul style="list-style-type: none"> • Migration of flock if required • Treatment 	<ul style="list-style-type: none"> • Availing insurance benefits. • Culling of unproductive flock 	
Cyclone	NA	NA	NA	
Shortage of feed ingredients	<ul style="list-style-type: none"> • Storage and making of feed concentrates • Proper feed requirement data base 	<ul style="list-style-type: none"> • Establishment of communication with other state agencies • Use of stored feed ingredient • Import of feed from other areas 	<ul style="list-style-type: none"> • Repair and maintenance of feed store

based on forewarning wherever available

2.5.3 Fisheries/ Aquaculture

	Suggested contingency measures		
	Before the event ^a	During the event	After the event
1) Drought			
A. Capture			
Marine	–	–	–
Inland			
(i) Shallow water depth due to insufficient rains/inflow	Adopt appropriate measures to reduce water seepage or infiltration	Harvest the crop partially	Re stock
(ii) Changes in water quality	<ul style="list-style-type: none"> • Regular observation to check the water quality and remove the pollutants if any. 	<ul style="list-style-type: none"> • Add oxy-flow to improve oxygen • Churning of pond water 	<ul style="list-style-type: none"> • Maintain appropriate level of water if possible • Check the water quality and remove the pollutants if any.
(iii) Any other	–	–	–

B. Aquaculture			
(i) Shallow water in ponds due to insufficient rains/inflow	<ul style="list-style-type: none"> • Adopt appropriate measures to reduce water seepage or infiltration from ponds • Avoid any kinds of water pollution and maintain water pH 	<ul style="list-style-type: none"> • Ensure the Oxygen availability into ponds for the survival of fish • Avoid any kind of water pollution • Add oxy-flow to improve oxygen into ponds. • Churning of pond water 	<ul style="list-style-type: none"> • Maintain appropriate level of water in ponds • Check the water quality and remove the pollutants if any.
(ii) Impact of salt load build up in ponds / change in water quality	<ul style="list-style-type: none"> • Add some fresh water from other source like cannel etc 	<ul style="list-style-type: none"> • Add oxy-flow to improve oxygen into ponds. • Churning of pond water • Add fresh water into pond for life saving and to reduce salt load 	<ul style="list-style-type: none"> • Add fresh water into pond for life saving and to reduce salt load • Maintain appropriate level of water in ponds • Check the water quality and remove the pollutants if any.
(iii) Any other	--	--	--
2) Floods			
A. Capture			
Marine	--	--	--
Inland			
(i) No. of boats / nets/damaged	Boats, nets etc should be taken out from water bodies	Close supervision of flood condition	Damaged boat or nets should be repaired
(ii) No. of houses damaged	--	--	Repair the damaged house.
(iii) Loss of stock	--	--	Sanitation and proper disposal of corpse
(iv) Changes in water quality	Increase the height of bunds.	--	--
(v) Health and diseases	--	Treatment if possible	--
B. Aquaculture			
(i) Inundation with flood water	<ul style="list-style-type: none"> • Repair the bunds to prevent the inflow of water 	<ul style="list-style-type: none"> • Avoid inflow of flood water from outside. 	<ul style="list-style-type: none"> • Repair the damaged bunds • Check water quality

	<ul style="list-style-type: none"> • If inflow water is not polluted then place the net at inlet and outlet • Raise the height of bunds • Plan a proper drainage system at farm • Plantation of soil binding plants at bund 	<ul style="list-style-type: none"> • If inflow water is not polluted that can be permitted to flow through net placed at inlet and outlet of pond. • Fencing of net required in case of overflow to avoid the migration of fish 	<ul style="list-style-type: none"> • Change the water if it is polluted
(ii) Water contamination and changes in water quality	<ul style="list-style-type: none"> • Liming @300 kg/ha 	<ul style="list-style-type: none"> • Stop inflow of contaminated water 	<ul style="list-style-type: none"> • Maintain appropriate level of water in ponds • Check the water quality and remove the pollutants if any.
(iii) Health and diseases	<ul style="list-style-type: none"> • Liming @300 kg/ha • Vaccination 	<ul style="list-style-type: none"> • Diagnostic measures and provide appropriate medicines 	<ul style="list-style-type: none"> • Liming and medication as per requirement • Use Cifex to control ulcerative syndromes
(iv) Loss of stock and inputs (feed, chemicals etc)	<ul style="list-style-type: none"> • Marketable stock should be sold 	<ul style="list-style-type: none"> • Immediately remove the dead fishes from ponds and do sanitation 	<ul style="list-style-type: none"> • After sanitation add new stock
(v) Infrastructure damage (pumps, aerators, huts etc)	<ul style="list-style-type: none"> • Damageable infrastructures should be secured 	<ul style="list-style-type: none"> • Do not supply Electric in floodéd area 	<ul style="list-style-type: none"> • Repair and service the damage infrastructure
(vi) Any other			
3. Cyclone / Tsunami	NA	NA	NA
A. Capture	--	--	--
Marine			
(i) Average compensation paid due to loss of fishermen lives			
(ii) Avg. no. of boats / nets/damaged			
(iii) Avg. no. of houses damaged			

Inland	--	--	--
B. Aquaculture	--	--	--
(i) Overflow / flooding of ponds			
(ii) Changes in water quality (fresh water / brackish water ratio)			
(iii) Health and diseases			
(iv) Loss of stock and inputs (feed, chemicals etc)			
(v) Infrastructure damage (pumps, aerators, shelters/huts etc)			
(vi) Any other			
4. Heat wave and cold wave			
A. Capture			
Marine	--	--	--
Inland			
B. Aquaculture			
(i) Changes in pond environment (water quality)	<ul style="list-style-type: none"> • Maintain appropriate level of water in ponds <i>ie.</i> 1.75m in 2m deep ponds • Check the water quality and remove the pollutants if any 	<ul style="list-style-type: none"> • Maintain appropriate level of water in ponds <i>ie.</i> 1.75m in 2m deep ponds • Check the water quality and remove the pollutants if any 	<ul style="list-style-type: none"> • Maintain appropriate level of water in ponds <i>ie.</i> 1.75m in 2m deep ponds • Check the water quality and remove the pollutants if any
i) Health and Disease management	<ul style="list-style-type: none"> • Liming@300kg/ha 	<ul style="list-style-type: none"> • Medication as per requirement 	<ul style="list-style-type: none"> • Remove the dead fishes from ponds and add new stocks to compensate • the production

based on forewarning wherever available
